

# Ultra White Gloss Glaze CGE502

Ultra White Gloss Glaze is an **Opaque** white gloss glaze. Decorate on top of Ultra White with Color Concentrates for a Majolica technique and apply 1 coat of CG900 Crystal Clear for a finishing touch. It can be tinted for an opaque colored gloss glaze and can also be used for a textured technique like the Tumbled Marble look and much more. Ultra White is a **Non-Toxic** and **Food Safe** non-moving Gloss Glaze. Available in 4-oz., pints and gallons.

### Majolica

1. 3 coats CGE502 Ultra White Gloss Glaze.
2. *Conditioned* Color Concentrates with CSP01 Gloss Medium applied on top of for design.
3. 1 coat of CG900 Crystal Clear over entire surface.

If Clear is not applied over the top you will have some movement in color.

### Color Concentrates

CC151 Cerulean Blue  
CC163 Shadow Green

### Opaque Colored Gloss Glaze

1. Mix 2 parts CGE502 Ultra White Gloss Glaze with 1/2 part CC163 Shadow Green. Amount of color concentrate will determine end color.
2. Apply 3 coats for an opaque colored gloss glaze.

Keep in mind that whatever color you mix with the CGE502 it will be a pastel colored gloss glaze.

### Tinting Ultra White Gloss Glaze:

When using Ultra White to create a tint you really can go by "What you See is What you Get".

Start with a small amount of Color Concentrate added to glaze and mix well to see color you will get. Keep adding Color Concentrate (Pigments) to deepen the color. The pigments are very concentrated and it doesn't take much to create a tint.

Always do a test tile of your mixture to make sure you have the color you want.

### Tumbled Marble Look

1. 2 coats of CGE502 Ultra White Gloss Glaze.
2. 50/50 mix of CGE502 and CSP20 Terra Firma sponged on 2 coats.
3. Washes of CSP01 Gloss Medium with Color Concentrates 50/50 mix with wet fan brush.
4. Blend 1 part CGE502 to 2 parts water and apply a wash over entire surface to give a polished satin look.
