

## CGE590 (Matt with Speck)

Potters Stone Buff is a **Non-Toxic** and **Food Safe** Speckled Matt Glaze. Available in 4-oz., pints and gallons. When applying Potters Stone Buff over very dark colors, such as black, dark blue, dark green that have been blocked in as solid coverage, milking may occur. (hence the name buff)

**Firing Range:** Cone 06 Earthenware to Cone 6 Stoneware/Porcelain.

### Majolica

1. Apply 3-4 smooth coats CGE590 Potters Stone Buff.
2. *Conditioned Color Concentrates with CSP03 Matt Medium applied on top of for design. The more coats you apply the more opaque the color. (Conditioning is to add a drop or two of CSP03 Matt Medium to the Color Concentrate. This will eliminate blistering.)*
3. Fire to 05 in manual kiln sitter or 06 with a 20 minute hold on Computer controlled kilns.

Color Diffusion!  
A CFE Exclusive  
Look and Technique...

### PSB—With Flow Products

1. Create PSB Tint (CC140) and apply 3-4 smooth coats.
2. Apply 2 coats of CSP41 Flowing Art in a drip pattern. Allow to dry between coats.
3. Apply 2 coats of CSP40 White Drape to same area. Allow to dry between coats.
4. Fire to 05 in manual kiln sitter or 06 with a 20 minute hold on Computer controlled kilns.

### High Fire

On Stoneware/Porcelain cone 6 firing...not all of the colored blends will hold and you will obtain a clear speck matt glaze. Always run a color test check firing on colors at high fire.

### PSB Tint & Diffusion

Blending new colors with Potters Stone Buff is so easy and the results range from soft muted stone colors to dramatic "brights". It simply depends on the amount of Color Concentrates (pigments) you decide to add to the blend.
