Color Strokes

62 Vibrant Colors called "Color Strokes", by Colors for Earth, produce the beautiful full coverage of an underglaze and can be directly applied to bisque. While applying three coats will produce solid coverage, you can also apply a single coat to achieve brushstrokes or use in a pattern. Unlike other bisque underglazes, the CS line can also be applied to greenware (as long as you do not cover the entire piece) and produces beautiful smooth results. NON-TOXIC and food safe when covered with transparent or clear glaze, or attain the look and functionality of a Chalkboard when the colors are left unglazed. Not only can you create a "chalkboard look", but the Speckled Base can be added to any Color Stroke (or Color Concentrate) to get a speckled look. Caps and tips, specifically designed to fit the CS bottles, are also available to use for design work. Color strokes allow you to create beautiful projects without working on delicate greenware and give you many creative options. Firing range from 04 to cone 6 high fire. Available in 2oz., 8oz. & Pints.
