Flexible Rubber Stamps with Foam Backing

These rubber stamps have foam backing, making them rigid enough to hold and stamp, but flexible enough to form around rounded edges. Ideal with Color Concentrates, glazes, enamels as well as stamping in clay for unique patterns and textures. The stamps come with a white paper backing that should be removed. Before using your stamp you should clean with white distilled vinegar. Clean with water and pat dry. A soft brush can be used to clean out any color that is in the detail of the stamp.
