1. On greenware earthenware (04/06) vase, apply 4 coats of **CS612 Red Alert** to entire vase.
2. Fire to witness cone 04.
3. Roll glaze the inside of vase with **CGE501 Black Patent**, slightly thinned down.
4. If any areas are not covered well apply 2 more coats of Red Alert. Allow to dry and transfer pattern, alternating the 2 Iris around the vase. Depending on the size of vase you may have to add additional leaves for fillers between flowers.
5. With #10 or #12 Square shader, water load and corner load with **CC101 Cobalt Black** and float this color here and there adding shadows, dividing leaves, petals, etc. Refer to photo for placement.
6. With #4 and #1 Liner brush and **CC101 Cobalt Black** detail and outline with thick and thin lines.
7. With pencil create a wavy top around design. Block in 2 coats of **CC101 Cobalt Black** in this area. Allow to dry. Apply 2 coats of **CGE501 Black Patent** glaze over the same areas.
8. Because of the Black Patent glaze at the top you will only need to apply 1 coat of clear in that area but the rest of the vase will require 2 coats of **CSP01 Gloss Medium NT Clear Glaze**.
9. Stilt and fire to witness cone 06.
